Webex Adoption Acceleration and Training Services

Adoption Acceleration Services from Meet Me In The Cloud (MMITC) go beyond just telling you how your new technology works. We create a careful, well thought out plan, and then help you implement that plan. By mapping technology features to specific business outcomes, training end users, and analyzing results, MMITC Cloud helps you overcome collaboration technology adoption challenges.
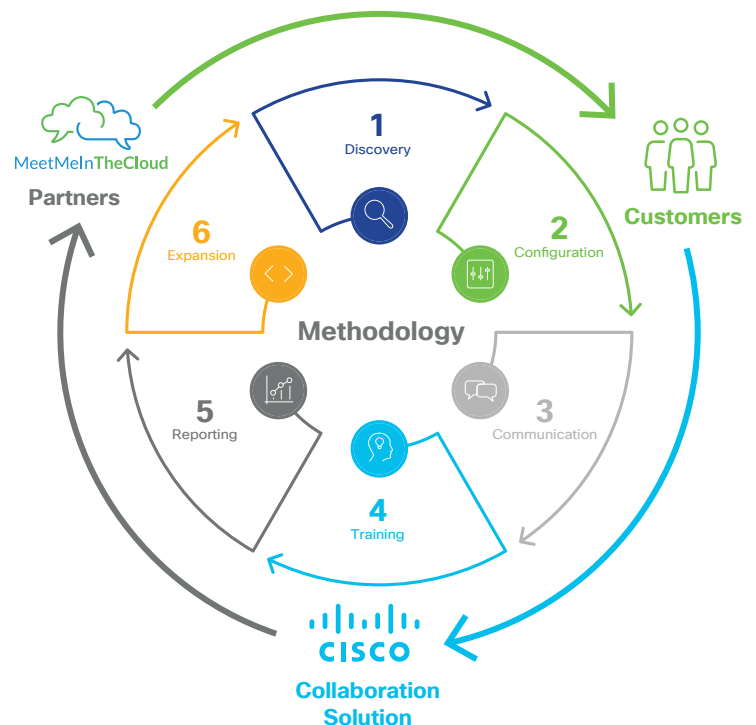

Mastering The Art of Adoption

Successful adoption of new technology is heavily dependent on end user adoption and user experience. Even after you've selected a new platform, planned its implementation, and perhaps even integrated the solution into your IT environment, it could be months before your organization is using it fully and effectively. That's where we come in. It's important to have knowledgeable guidance through the planning, implementation and adoption process of Cisco Webex.

Methodology

The Adoption Acceleration Services from MMITC is a proven methodology that can achieve full adoption to businesses of any size within 60 days.

The methodology includes formal project management and white glove services focused on site configuration, integrations, a communication plan to drive awareness and change management, multiple training options to meet the varying styles of adult learners and metrics reporting to ensure our customers have the insight needed to increase adoption and achieve their goals.

Meet Me In The Cloud guarantees Webex adoption and success with all of our engagements!

Benefits of Professional Adoption Services

Hire Experts

Our expert Webex professionals are well-versed in best practices gained from years of experience working with thousands of end-users. MMITC has successfully launched hundreds of Webex platforms for Higher Education, K-12, State and Local Government, large and small businesses, and nonprofit organizations. We're experts in collaboration – it's all we do.

Stragetic Plans

MMITC works hand-in-hand with each customer to create a deployment plan that optimizes Webex with aligned resources, a timeline, milestones, and deliverables. When part of a larger overall collaboration plan, the rollout may be conducted in phases to accommodate other video and third-party integration initiatives.

Flexible Training

Effective training drives adoption. To accommodate the variety of learning styles, our adoption services engagement include custom instructor-led live online training classes along with our three extensive libraries of custom video training modules. We can also deliver courses onsite at any location around the world.

Get Started

We can create a plan to the precise requirements of each customer and monitor usage to identify areas for improvement, however at the center of every successful Cisco Webex adoption engagement is a committed management team. True leadership and the right tools are essential for organizational transformation. We believe in the extreme value of Cisco Webex, and are dedicated to helping other organizations benefit from the operational advantages of using Cisco Webex.
